

Stay safe through the winter with Barum.

The new Barum Polaris 5 is the right choice for winter weather conditions. It offers excellent snow grip and ensures a safe and relaxed ride.

Barum. A brand of Continental.

Barum 

Good tyres. Good deal.

Polaris 5

Barum Polaris 5: The right choice for winter.

Excellent traction on snow.

Optimally arranged blocks with transverse incisions in the centre ribs and shoulders considerably improve grip on snow. The special arrangement of multifunctional sipes ensures a better grip in all directions when in contact with the road surface. The special profile design in the middle improves the lateral grip on snow. This results in exceptionally good traction, short braking distances and safe driving on snowy roads.

Safe performance on wet roads.

Optimized positioning of the longitudinal grooves and lateral grooves improves water displacement from the tread on wet roads. Additional carvings in the shoulder area ensure optimum contact with the ground, which improves contact on wet roads. This arrangement of lateral and circumferential grooves ensures balanced, safe performance on wet roads.

More comfort for relaxed driving.

An improved tread structure with differently graded blocks whose length varies on both sides of the tread minimizes rolling noise. The resulting low noise level leads to a relaxing ride and less stress for the driver and other passengers.
